Application
All CVTO combination transformers shown in this section are suitable for revenue metering or protective relaying applications on high voltage systems rated 115 kV, 69,000 volts at 550 BIL primary with current ratings from 10 to 3000 amperes.

Fabrication
Domes and tanks are fabricated from mild steel and protected with the latest technology, powder coated external finish. ANSI 70 light gray is the standard finish color. Stainless steel domes and bases are available for high corrosion applications.

One piece, wet-process porcelain insulators are used to provide high mechanical strength with suitable cantilever for high wind and seismic locations. ANSI 70 light gray is the standard color.

Primary terminals are NEMA standard 4-hole pads, suitable for copper or aluminum connectors. The H1 terminal is provided with a by-pass protector to safeguard primary turn-to-turn insulation in cases of voltage stresses induced by high frequency, high current surges.

Separate weatherproof, hinged cover, terminal boxes with three (3) 1½” conduit hubs are supplied for the CT and VT secondary terminations. A shorting terminal block is provided in the CT element box.

All CVTO's are equipped with a 5kV HO bushing, NEMA 2-hole ground pad, magnetic oil level gauge, ¾” drain valve, ¾” oil fill plug and pressure relief valve.

Accuracy and Thermal Rise
Current Transformer elements are available at 0.3 accuracy class at burdens of B0.1 to B1.8 for revenue metering applications. In addition, 0.15 and 0.15s high accuracy class designs are available.

CVTO-550 voltage elements are designed to provide 0.3% accuracy class when loaded with IEEE burdens of W, X, Y, Z and ZZ. Optional high accuracy 0.15% class is available at W, X, Y and Z Burdens.

Extended range elements and custom designs are available for wind and solar applications. Contact the factory with your specific requirements.

Magnetic Circuits
CVTO's are available in single ratio, dual ratio by secondary tap, dual ratio by series-parallel primary connection, or multi-ratio winding configurations as well as multiple core designs to fit specific requirements.

Mounting
All CVTO transformers are designed for outdoor, vertical platform mounting and must not be tilted more than 15 degrees from vertical during installation or shipment.

Seismic Rating
The CVTO-550 has been qualified through Dynamic Analysis to withstand High Level per IEEE 693-2005.

Testing
Every transformer is tested in accordance with IEEE Standard C57.13 (latest revision).
Product Data
CVTO-550
Combo Current Voltage Transformer
115 kV Class
550 kV BIL

Combination Current Voltage Transformer

Dimensions and Details

CVTO-550
550 kV BIL
Weight: 2,100 lbs.
Oil: 110 Gallons.
Creep Min: 74 inches
Strike Min: 53 inches

Notes:
1. NEMA 2- hole Ground Pad
2. Removable Ground Strap
3. HO Neutral Bushing and Cover Guard
4. Mild Steel Tank
5. Porcelain Insulator, ANSI 70 Lt. Gray
6. Expansion Chamber
7. ¾” NPT Vacuum/Fill Port/PRV
8. ½” Drain Valve
9. Base Plate with (4) 0.62” x 1.50” Mounting Slots
10. Primary Terminals 4 hole NEMA Pad
11. Oil Level Indicator
12. Lifting Eyes
13. Terminal Box Cover and Nameplate
14. Secondary Terminal Box with (3) 1.5” conduit hubs.
15. By Pass Protector
