Inductive Voltage Transformer

Application
The VTO-200 is an outdoor, inductive voltage transformer suitable for metering or relaying applications on 34,500 volt systems at 200 kV BIL, at 60 Hz.

Fabrication
All ITEC transformers utilize high permeability, low loss, grain orientated silicon steel cores to optimize performance and physical size of the transformers.

Transformer tanks and expansion chambers are manufactured from mild steel and finished with the latest powder coating technology to withstand the most rigorous environmental conditions. Standard finish color is ANSI 70 light Gray.

All VTO’s are hermetically sealed, full vacuum assemblies provided with a dry nitrogen cushion.

One-piece, wet processed porcelain bushings are used on all VTO’s. Bushings are designed to exceed IEEE standards for creep and strike distances. The standard bushing color is ANSI 70 light Gray.

The primary terminal is a 4-hole NEMA pad, suitable for use with copper or aluminum bus connections. The secondary connections are ¼”-20 copper studs with hardware located in a weatherproof, hinged cover, terminal box with three (3) 1-½” conduit hubs. All VTO’s are equipped with a stainless steel, NEMA 2-hole ground pad.

All VTO’s are equipped with a 5kV HO bushing, magnetic oil level gauge, ½” drain valve, ¾” oil fill plug and pressure relief valve.

Accuracy
VTO-200’s are designed to provide 0.3% accuracy class when loaded with IEEE burdens of W, X, M, Y, Z and ZZ. Optional High Accuracy 0.15% class is available at W, X, M, Y and Z Burdens.

Magnetic Circuits
The VTO-200 is available as a single ratio or dual ratio, and up to three secondary windings.

Mounting
The VTO-200 is designed for mounting on substation structures.

Seismic Rating
The VTO-200 has been qualified through Dynamic Analysis to withstand High Level per IEEE 693-2005.

Testing
Every transformer is tested in accordance with IEEE Standard C57.13 (latest revision). Standard tests include applied and induced voltage, accuracy, polarity, dissipation factor and partial discharge. All transformers are guaranteed to be partial discharge free at 135% of nominal system voltage.

Options
- Stainless Steel Tank and/or Expansion Chamber.
- Extra Creep Bushings
